

ASSIGNMENT

Name: Shatarupa Sen

Subject: E-Commerce & ERP

Code: OEC-IT802A

Roll no.: 4500222029

Q4 How do EDI systems integrate with ERP to improve supply chain efficiency?

Electronic Data Interchange (EDI) is the electronic exchange of business documents between organizations in a standard format. ERP (Enterprise Resource Planning) is software that manages business processes like inventory, finance, and Procurement.

When EDI integrates with ERP:

- Business documents such as purchase orders, invoices and shipping notices are automatically transferred into the ERP system
- Data is processed without manual entry
- Inventory and order details are updated in real time
- ERP can generate invoices or confirmations which are sent to partners through EDI

Benefits to supply chain:

- Reduces manual errors
- Speeds up order processing

- Improves inventory management
- Enhances coordination with suppliers
- Reduces paperwork and operational cost

Thus, EDI-ERP integration makes the supply chain faster, more accurate and efficient.

Q6 ~~Q6~~ Discuss the role of handheld devices and mobile computing in the growth of Mobile Commerce (M-Commerce).

Mobile Commerce (M-commerce) refers to buying and selling goods and services using mobile devices like smartphones and tablets.

Role of Handheld Devices:

- Enable shopping anytime and anywhere
- Support mobile apps for easy browsing and ordering
- Provide mobile payment options like digital wallets
- Offer location-based services and promotional alerts

Role of Mobile Computing:

- Wireless networks (4G/5G) enable fast internet access
- Cloud computing supports mobile applications
- Secure payment systems ensure safe transactions
